PROFESSIONAL SUMMARY

Fullstack Web Developer with expertise in React, JavaScript, Node.js and scalable backend systems. Experienced in building high-performance web applications, RESTful APIs, and cloud-based solutions. Strong foundation in Machine Learning, Image Processing, and Industrial Automation, combined with a commitment to clean code principles, test driven development (TDD), and continuous learning.

EDUCATION

DR. DY PATIL INSTITUTE OF TECHNOLOGY

Bachelor of Computer Engineering
Major in Computer Science; Honours in Cyber Security
Cumulative GPA: 9.11/10.0
Relevant Coursework: Image Processing, Software Engineering; IoT; Artificial Intelligence.

Pune, MH
2020 – 2023

MAEER's MIT POLYTECHNIC

Bachelor of Computer Engineering
Major in Computer Science
Cumulative Percentage: 91.66/100

Pune, MH
2017 – 2020

WORK EXPERIENCE

General Industrial Controls

-  **Assistant Software Engineer** July 2024 – Present | Pune, India
- Built a React.js-based **Task Management Portal** with a Node.js/Express backend and MongoDB, enabling task tracking, project assignment, and role-based access for employees and managers.
 - Architected a separate MVC API server, deployed full-stack solution using Vercel CI/CD, showcasing expertise in React, REST APIs, and modern web architecture.
 - Led the development of IoT-integrated **industrial automation** systems, including programming and functional utilities for Genie Pro PLC and SMPS using .NET Core, reducing testing time by 65%.
 - Analyzed Conducted comprehensive testing for hardware-software integration while coordinating with cross-functional engineering teams to meet production specifications. Mentored junior developers on software architecture best practices and technical implementation strategies.
 - Automated manual inspection using **vision inspection** techniques with the help of Keyence IV3 Controller, improving production quality by 100%.
 - Documented technical processes and created comprehensive user guides to support internal systems effectively.
-  **Graduate Engineer Trainee** July 2023 – June 2024 | Pune, India
- Designed **Automatic Label Printing** for functional test software, which improves **operational efficiency** by **40%**.
 - Developed **AOI** using OpenCV and Image Processing, improving quality by 100% **reduced** production **time** by **50%**.
 - Integrated Label Printing data into Reporting Solution Web-App, resulting in a **40% improvement in production tracking**.
-  **Software Engineer Intern** Feb 2023 – Jul 2023, Pune, India
- Worked on **Proof of Concept** for an **AOI**, reducing estimated testing time by 50% through automation.

GeeksForGeeks

-  **Technical Content Writer** Aug 2021 – Jan 2022, Pune, India
- Conducted research and wrote **16 Technical Articles** to meet target audience needs. [\[View\]](#)
 - Transformed complex technical insights into easy-to-understand, user-friendly content.

PROJECTS

1. Capitalflex Fintech Portal

Feb 2025 – MAY 2025 | Remote

- Technologies : **React.js, TypeScript, Node.js, MongoDB, Vercel**
- Developed a responsive banking web application enabling users to explore loans, check CIBIL scores, calculate EMI/eligibility, and submit loan applications online.
- Implemented frontend using React.js and TypeScript, with backend services built in Node.js and MongoDB.
- Deployed with CI/CD integration on Vercel, ensuring a smooth and scalable release pipeline.

2. Capitalflex Admin Dashboard

MAY 2025 – JULY 2025 | Remote

- Technologies : **React.js, MongoDB, TypeScript, React Query, TailwindCSS, Mongoose, Axios, JWT, Vercel**
- Engineered a secure and scalable admin dashboard to manage users, loan enquiries, rewards, and transactions.
- Built using React.js, TailwindCSS, and React Query for a fast, interactive UI, and Node.js, Express.js, Mongoose, and JWT for secure API services.
- Enabled role-based access control, data filtering, and analytics with complete admin-side control over financial operations.

3. Task Management Portal

- Technologies : **React.js, Node.js, MongoDB**
- Led the Development and deployed a **Task Management Web Portal** using **React.js**, enabling employees to efficiently manage and track their daily tasks linked to assigned projects.
- Implemented role-based authentication and access control to support separate User/Employee and Admin/Manager dashboards.
- Ensured clean and responsive UI for seamless usage across devices, with secure backend APIs supporting data validation and integrity.

4. Searchable PDF Generator

- Technologies : **Python, Streamlit, PyPDF2, Tesseract OCR, OpenCV.**
- Developed a web application using **Streamlit** that converts images and PDFs into searchable PDFs using **OCR technology**.
- Supports **batch processing, progress tracking, file merging** providing users with an efficient and user-friendly experience.
- Utilized **Tesseract OCR** for converting text within images or PDFs into searchable text.
- Processes multiple files simultaneously, including mixed file types (images and PDFs).

5. Asset Management Studio

- Technologies : **ASP.NET MVC, MSSQL, Entity Framework.**
- Developed a web app for organizational use to **Manage Assets** and their assignments.
- Application is tailored for both **Admin** and **User roles** to enhance **Asset Tracking and Reporting**.
- Provides comprehensive asset and user data with options to export in PDF/Excel formats.
- Delivers visual analytics through **Google Charts** and **Graphs** for better decision-making.

SKILLS

Languages: JavaScript, TypeScript, C#, VB.NET, Java, Python

Web & Application Frameworks: React.js, Node.js, ASP.NET (MVC & Web API), WPF, WinForms, Entity Framework, Streamlit

Technologies & Tools: Machine Learning, Image Processing, Tesseract OCR,, OpenCV, BarTender SDK, Keyence IV3 Navigator

Databases: Microsoft SQL Server, MongoDB, SQLite

Design Patterns & Architecture: MVC, MVVM

DevOps & Version Control: Git, GitHub, Gitea, Vercel, Visual Studio, VS Code

Soft Skills: Problem Solving, Communication, Collaboration, Time Management, Teamwork, Ownership & Stewardship.

Course Work Highlights: Object-Oriented Programming, DSA, DBMS, Operating Systems, Computer Networks.

RESEARCH AND PUBLICATIONS

“Smart Travel Automated Vehicle” [\[View\]](#)

International Research Journal of Engineering and Technology (IRJET)

Volume: 07 Issue: 02 | Feb 2020 | e-ISSN: 2395-0056 | p-ISSN: 2395-0072

ACHIEVEMENT

- **Dashing Debutant – Generation Next Performer (FY 2023–2024):**
Honored for exceptional performance and impactful contributions as a new joiner in the organization. Recognized for excellence in horizontal deployment of the Automatic Label Printing utility across multiple functional testing software platforms.
- **Silver Recognition – CII DigiAI (Machine Learning Category):**
Secured Silver in the national-level project competition conducted by the Confederation of Indian Industry (CII) for innovative implementation of machine learning concepts in the Netram project.
- **Process Optimization Recognition – SMPS Programming:**
Awarded for significantly reducing SMPS programming cycle time from 80 seconds to 12–15 seconds by integrating device programming and verification into a single-stage process for production.
